

Lexington Children's Theatre Touring Requirements

Stage Requirements: Our touring productions require a 20'W by 20'D by 14'H open playing space. We provide our own set.

Lights/Video Requirements:

A general wash is more than sufficient. If lighting variations are possible it is lovely to have both a daytime and nighttime cue. We have a cued script that would indicate when to switch back and forth between the two. It is by no means necessary to the successful outcome to have this.

Sound Requirements: Tour usually travels with a sound package if needed in which case they need access to a standard outlet. If the venue wishes to mic actors (generally advised for venues over 400 audience members), venue must provide wireless mics and operator, unless otherwise arranged with LCT.

Load in Requirements: Our sets are built to load in through a standard door. We need a clear path to get to the stage and a place near the loading door to pull up a 15 passenger van. Depending on the size of the show the load in will take between one and two hours.
